Understanding the GRE Structure

The Graduate Record Examination (GRE) is a standardized test that measures a student's readiness for graduate school. The GRE consists of three main sections: Verbal Reasoning, Quantitative Reasoning, and Analytical Writing. Each section is designed to assess different skill sets necessary for success in graduate-level coursework.

Sections of the GRE

The GRE is divided into the following sections:

- **Verbal Reasoning:** This section evaluates reading comprehension, critical reasoning, and vocabulary usage.
- **Quantitative Reasoning:** This part focuses on basic math skills, understanding

quantitative information, and solving problems using mathematical concepts.

- **Analytical Writing:** This section assesses a test-taker's ability to articulate complex ideas effectively, analyze arguments, and communicate clearly.

Understanding these sections is crucial for selecting the right GRE workbooks as different books emphasize different areas of the exam.
